

Global Equity Core

Equal-Weight Five-Market Blend · United States & Asia-Pacific

FactSheet as of June30,2026 | Holdings look-through as of August 06,2026

INVESTMENT OBJECTIVE

Model 2 pursues broad global equity growth by holding five single-market index ETFs in **equal 20% weights** — four Asia-Pacific markets (South Korea, Taiwan, China and Japan) paired with the U.S. large-cap core. The equal-weight construction deliberately diversifies away from single-country concentration and gives the portfolio meaningful exposure to the Asian technology and semiconductor complex alongside the breadth of the S&P 500.

The result is a technology-tilted, globally diversified core with a value-and-growth balance: cyclical Asian manufacturers and financials on one side, U.S. mega-cap quality on the other.

SLEEVE COMPOSITION

TICKER	FUND / MARKET	WEIGHT	EXPENSE	FUND AUM	HOLDINGS	1Y NAV %
EWY	iShares MSCI South Korea ETF South Korea	20%	0.59%	\$24.5B	78	188.5
EWT	iShares MSCI Taiwan ETF Taiwan	20%	0.59%	\$11.2B	79	98.9
MCHI	iShares MSCI China ETF China	20%	0.59%	\$5.9B	574	-5.2
EWJ	iShares MSCI Japan ETF Japan	20%	0.49%	\$22.3B	168	29.9
VOO	Vanguard S&P 500 ETF United States	20%	0.03%	\$1.68T	506	22.3

Sleeve weights are target allocations; each underlying fund's expense ratio, AUM, holdings count and 1-year NAV total return are from the respective iShares (BlackRock) and Vanguard fact sheets dated June 30, 2026. Fund AUM shown is the total net assets of each underlying fund, not an amount held by the model.

SUITABLE FOR

Growth-oriented investors with a **5+ year horizon** seeking diversified global equity exposure with a pronounced technology and Asia-Pacific tilt, who can tolerate elevated volatility and single-country / emerging-market risk in exchange for higher return potential.

GEOGRAPHIC ALLOCATION (TARGET)
BY MARKET — EQUAL WEIGHT

■ South Korea	20%
■ Taiwan	20%
■ China	20%
■ Japan	20%
■ United States	20%

Four Asia-Pacific sleeves (80%) balanced by U.S. large-cap core (20%).

BLENDED SECTOR ALLOCATION (LOOK-THROUGH)

Information Technology	40.94
Financials	14.12
Industrials	11.95
Consumer Discretionary	10.30
Communication Services	7.94
Health Care	4.66
Materials	3.14
Consumer Staples	2.71
Energy	1.44
Utilities	1.05
Other / Cash	1.02
Real Estate	0.73

SECTOR NOTES

Information Technology dominates at 41%, reflecting the semiconductor weight of Taiwan (TSMC), Korea (Samsung, SK Hynix) and U.S. mega-cap tech. Financials (14%) and Industrials (12%) provide the main non-tech ballast, largely from Japan and China. The blend is structurally growth-and-cyclical, with light defensive (Staples, Utilities) exposure.

Top 3 sectors **67%**

Defensive (Staples + Util + RE) **4.8%**

Blended sectors computed as the equal-weighted (20% each) combination of each fund's June 30, 2026 GICS sector weights. Figures may not sum to 100% due to rounding and cash.

TOP 10 HOLDINGS — BLENDED LOOK-THROUGH

#	Security	Sector	Market	Weight
1	Samsung Electronics	Info. Technology	South Korea	4.23%
2	Taiwan Semiconductor (TSMC)	Info. Technology	Taiwan	4.20%
3	SK Hynix	Info. Technology	South Korea	4.05%
4	Tencent Holdings	Communication Svcs.	China	2.91%
5	Alibaba Group	Consumer Discretionary	China	2.05%
6	NVIDIA Corp	Info. Technology	United States	1.50%
7	Apple Inc	Info. Technology	United States	1.32%
8	MediaTek	Info. Technology	Taiwan	1.26%
9	Mitsubishi UFJ Financial	Financials	Japan	0.92%
10	Microsoft Corp	Info. Technology	United States	0.86%

Blended top-10 concentration
23.3%

Look-through weights = (20% sleeve weight) × (security's weight within fund), aggregated across all five funds using holdings filed August 06, 2026. De-duplicated underlying equity securities: 1,397. Diversification does not assure a profit or protect against loss.

NAV total return to June 30, 2026 — 1Y absolute; 2Y / 3Y / 5Y annualized (CAGR). Per-fund figures are from the source data provided;

Blended Portfolio = equal-weight (20%) average of the five sleeves.

Nifty 500 TRI computed from NSE daily Total-Return index levels (INR, not currency-adjusted to the USD portfolio).

CALENDAR-YEAR RETURNS — ALL SLEEVES VS NIFTY 500 TRI

Series (NAV, %)	2021	2022	2023	2024	2025
Blend	3.93%	-25.89%	11.83%	6.62%	30.54%
VOO	27.04%	-19.52%	24.35%	23.35%	16.39%
EWJ	-0.89%	-18.70%	17.81%	4.62%	20.33%
EWY	-9.51%	-27.47%	16.02%	-22.34%	91.02%
EWT	25.47%	-39.71%	14.61%	12.45%	-3.33%
MCHI	-22.47%	-24.07%	-13.59%	15.02%	28.27%
Nifty 500 TRI	31.60%	4.25%	26.91%	16.24%	7.76%

Blend = equal-weighted (20%) average of the five sleeves' calendar-year NAV total returns (USD). Nifty 500 TRI computed from NSE year-end Total-Return index levels (INR, not currency-adjusted). Korea (EWY) returned +97.6% in 2025, compressing the visual scale for the other series — see the table for exact figures.

BLENDED ANALYTICS & RISK VALUATION		RISK (3Y)		COST & BREADTH	
P/E Ratio	23.8x	Equity Beta	1.05	Blended Expense	0.46%
P/B Ratio	3.24x	Std Deviation	22.6%	Sleeves	5
		Concentration (Top 10)	23.3%	Underlying Securities	1,397

GLOSSARY

Equity Beta (3y): sensitivity of returns to the market (S&P 500); >1 indicates greater volatility than the market.

P/E & P/B Ratios: price-to-earnings and price-to-book valuation multiples; blended values are weighted averages of the sleeves.

NAV Return: total return based on the fund's net asset value, assuming reinvested distributions.

Blended / Look-Through: a portfolio-level figure built by combining each sleeve's underlying data in proportion to its 20% weight, rather than a figure from a single fund.

Expense Ratio: annual fund operating cost as a % of assets; the blended figure is the weighted average of the five sleeves.

Important information. This model portfolio fact sheet is for informational and illustrative purposes only and does not constitute investment advice, an offer, or a solicitation to buy or sell any security. Blended figures are derived by the adviser from the underlying funds' published data (iShares/BlackRock and Vanguard fact sheets dated June 30, 2026; holdings files dated August 06, 2026) and assume static 20% weights; actual results of an implemented portfolio will differ due to rebalancing, timing, transaction costs, taxes and cash flows. International and emerging-market investing involves heightened risks including currency, liquidity, political and single-country concentration risk; the technology and semiconductor tilt adds sector-concentration risk. The Nifty 500 TRI comparison is INR-denominated and not currency-adjusted to the USD portfolio. **Past performance does not guarantee future results.** Investments may lose value and are not FDIC insured or bank guaranteed. Read each underlying fund's prospectus before investing.
