WHY THIS ETF?

Truly Global, One Ticker

~1,300 companies across developed and emerging markets in a single line.

Low-Cost, Passive

0.20% TER — one of the cheapest all-country global index funds available.

Large + Mid Cap

Covers ~85% of global free-float market cap, not just U.S. mega-caps.

Accumulating

Dividends are reinvested automatically — tax efficient compounding for many investors.

INVESTMENT OBJECTIVE

The fund seeks to track the investment results of the **MSCI All Country World Index (Net)**, providing long-term capital growth through broad, low-cost exposure to large- and mid-cap companies across developed and emerging equity markets worldwide.

GLOSSARY — KEY TERMS

NAV TOTAL RETURN

Performance based on the fund's net asset value, reflecting the value of underlying holdings with income reinvested.

ACCUMULATING

Dividends are not paid out but reinvested inside the fund, which raises the share price over time.

3Y BETA (1.00)

Sensitivity to the benchmark. 1.00 means the fund has moved in line with its index — it effectively is the market.

TER / OPTIMISED

Total Expense Ratio is the annual cost. "Optimised" means the fund samples the most relevant constituents rather than holding every one.
