

US Core with Asia-Pacific Satellite

Fact Sheet as of Aug 31, 2026 | Holdings look-through as of August 31, 2026

INVESTMENT OBJECTIVE

Model 4 anchors the portfolio in the U.S. large-cap market via a **60% S&P 500 core** (VOO), then adds a **40% Asia-Pacific satellite** spread across South Korea (15%), Taiwan (10%), China (10%) and Japan (5%). The design keeps the stability and breadth of U.S. mega-cap equity at the center while dialing in targeted exposure to the Asian technology and semiconductor complex for incremental growth.

Relative to a pure global-equal-weight blend, this structure is lower-volatility and more U.S.-centric, yet retains a meaningful semiconductor and emerging-Asia tilt. It suits investors who want an S&P 500 foundation with a deliberate overweight to Asian growth leaders.

SLEEVE COMPOSITION

Ticker	Fund / Market	Weight	Expense	Fund AUM	Holdings	1Y NAV %
VOO	Vanguard S&P 500 ETF United States	60%	0.03%	\$1.68T	506	22.3
EWY	iShares MSCI South Korea ETF South Korea	15%	0.59%	\$24.5B	78	188.5
EWI	iShares MSCI Taiwan ETF Taiwan	10%	0.59%	\$11.2B	79	98.9
MCHI	iShares MSCI China ETF China	10%	0.59%	\$5.9B	574	-5.2
EWJ	iShares MSCI Japan ETF Japan	5%	0.49%	\$22.3B	168	29.9

Sleeve weights are target allocations; each underlying fund's expense ratio, AUM, holdings count and 1-year NAV total return are from the respective iShares (BlackRock) and Vanguard fact sheets dated Aug 31, 2026. Fund AUM shown is the total net assets of each underlying fund, not an amount held by the model.

Suitable For

Investors who want a U.S. large-cap core as the foundation of their equity allocation but seek a deliberate, sized overweight to Asia-Pacific growth and semiconductors. Appropriate for a long horizon and moderate-to-high risk tolerance; less concentrated in any single foreign market than an equal-weight global blend.

GEOGRAPHIC ALLOCATION (TARGET)

BY MARKET — CORE & SATELLITE

United States	60%
South Korea	15%
Taiwan	10%
China	10%
Japan	5%

U.S. large-cap core (60%) with a four-market Asia-Pacific satellite (40%).

BLENDED SECTOR ALLOCATION (LOOK-THROUGH)

Information Technology	41.19
Financials	12.52
Industrials	10.17
Consumer Discretionary	9.36
Communication Services	8.63
Health Care	6.67
Consumer Staples	3.56
Materials	2.32
Energy	2.27
Utilities	1.60
Real Estate	1.17
Other / Cash	0.54

SECTOR NOTES

Information Technology leads at ~41%, driven by U.S. mega-cap tech plus the Korea/Taiwan semiconductor names. With VOO at 60%, the sector mix sits closer to the S&P 500 than Model 3 does — Health Care (~6.7%) and Consumer Staples (~3.6%) are better represented, giving a slightly more balanced, lower-volatility profile.

Top 3 sectors	~64%
Defensive (Staples+Util+RE)	~6.3%

Blended sectors computed as the weighted (60/15/10/10/5) combination of each fund's GICS sector weights from its Aug 31, 2026 fact sheet. Figures may not sum to 100% due to rounding and cash.

BLENDED ANALYTICS & RISK

VALUATION		RISK (3Y)		COST & BREADTH	
P/E Ratio	26.0x	Equity Beta	1.08	Blended Expense	0.25%
P/B Ratio	4.36x	Std Deviation	19.2%	Sleeves	5
		Concentration (Top 10)	26.6%	Underlying Securities	~1,397

GLOSSARY

Equity Beta (3y): sensitivity of returns to the market (S&P 500); >1 indicates greater volatility than the market.

P/E & P/B Ratios: price-to-earnings and price-to-book valuation multiples; blended values are weighted averages of the sleeves.

Standard Deviation (3y): dispersion of returns around the average; higher values indicate greater volatility.

NAV Return: total return based on the fund's net asset value, assuming reinvested distributions.

Blended / Look-Through: a portfolio-level figure built by combining each sleeve's underlying data in proportion to its target weight, rather than a figure from a single fund.

Expense Ratio: annual fund operating cost as a % of assets; the blended figure is the weighted average of the five sleeves.

Important information. This model portfolio fact sheet is for informational and illustrative purposes only and does not constitute investment advice, an offer, or a solicitation to buy or sell any security. Blended figures are derived by the adviser from the underlying funds' published data (iShares/BlackRock and Vanguard fact sheets dated Aug 31, 2026; holdings files dated August 31, 2026) and assume static 60/15/10/10/5 weights; actual results of an implemented portfolio will differ due to rebalancing, timing, transaction costs, taxes and cash flows. International and emerging-market investing involves heightened risks including currency, liquidity, political and single-country concentration risk; the technology and semiconductor tilt adds sector-concentration risk. **Past performance does not guarantee future results.** Investments may lose value and are not FDIC insured or bank guaranteed. Read each underlying fund's prospectus before investing.
